- Swimming

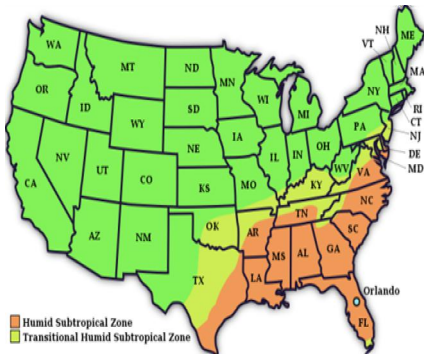

Palm Trees

Humid Subtropical

The Humid Subtropical climate is found on the east coast of continents. The southeast United States is a great example of this climate. Florida has a Humid Subtropical climate.

Things to be Prepared for When in this Climate

The summer weather has temperatures between 70 and 80 degrees. The summers last longer. There is only two seasons in this climate and they are summer and winter. The winter is not a cold winter. The average of winter weather is 45-50 degrees because it is kind of close to the equator.

Precipitation

Most Humid Subtropical areas get about 48 inches of rain each year. The high temperatures evaporate the water and causes humidity and precipitation.

What Kinds of Vegetation Does it Have?

The main vegetations in this area are evergreen trees, bushes, and shrubs. The reason why many plants in this area are evergreens is because of the long months of warmth and regular rain.

What Kind of Animals are Usually in this Area?

There are many types of animals here. There are mammals, reptiles, and amphibians.

The American Alligator is one popular animal in this area.

The Florida Panther is another popular animal.

Brazil's Capybara is also a popular animal.
