

Some of the animals in Scotland are yachts, red foxes, wolves, sheep, big horn sheep and, red stag. Some of the varmints are beaver, and muskrats, and coyotes and badgers

Some plants that are in Scotland are the alpine bearberry.

Multimedia design : Highland Climate by Austin

In the highlands you can go do a lot of things such as snow boarding, shopping, visiting sites and natural land marks, or going on boat tours. You can go hiking or take a tour on foot. You can have just a family day out fishing, skiing, or tubing in the summer. During the summer it is warm most of the time until it rains so you can wear shorts or whatever you want. During the winter you better pack some warm cloths because it can get cold outside. That is the best time because you can go outside and go

snow boarding and tubing and just have a good time.

In the highlands there is no telling what it is going to be doing outside. It could be raining out. It could be hot, or it could be really cold, so just be prepared.

The best time of the year to come is whatever time you want. if you like the winter, come when it snows, or if you like the summer, come when it is warm out.
