Mediterranean Facts

Baja California Mexico is the second-longest peninsula on earth.

Longer north to south than the U.S State of California.

Official language Spanish with many indigenous language spoken.

The Tijuana border is the most crossed international border in the world.

Almost 75% of the Baja population lives in 2 cities located at the border it shares with the united states.

Highest point is Picacho del Diablo.

The only two-lane paved road that connects the north to the south was finally completed in 1973.
